Subject: Support for Farmers Market request for space

Dear Mayor and Council,

I'm writing to provide my support for Esquimalt Farmers' Market's request for additional space to operate this summer.

I can't really add too much more to what Ms. Dwulit said in her letter, but the gathering of people to buy and sell goods and discuss the local news (and gossip), is one of the most longstanding and important remaining community-connecting initiatives in our neighbourhoods. It's incredibly important not just for the farmers and craftspeople, but for the exhausted and socially starved people in our community looking to be acknowledge every week by a familiar face or connect over a socially-distanced conversation (or just to get some fresh air and buy a delicious snack).

I know this may mean a sacrifice for some – which is an even larger sacrifice with how activity starved we all are this year – but I encourage you to support the Market's request.

Thank you,

Ryan Jabs | President, Community Builder

Request to Address Council at its Meeting Feb 1, 2021 @ 7:00 p.m.

Regarding Staff Report # 3 "Early Budget Approval for IRM"

My name is Francois Brassard and I live at 1162 Bewdley Ave in Esquimalt.

Honourable Mayor and Councillors,

As a member of ECO, I wish to speak in strong opposition to the Recommendation stated in Staff Report # 3 regarding the "Early Budget Approval for IRM."

In my view, this recommendation is an obstructionist tactic that would delay and deny what this Council unanimously put forward in November of last year regarding Esquimalt's waste management program. More than 80% of Esquimalt residents support this IRM project.

To delay this project would result in serious consequences in terms of GHG reductions, one of which is the CRD expansion of the Hartland landfill with its destruction of 73 acres of mature trees.

Achieving carbon neutrality requires bold action. The status quo cannot prevail. Esquimalt needs to be congratulated in making the first bold steps on the waste to energy project. Getting on with the final study will enhance the Township's reputation as a leader in the CRD.

Therefore, I would urge Council to give early budget approval to study and investigate the implementation of Integrated Resource Management with a project budget of \$100,000.

Thank You.

Francois Brassard

Subject: In favour of gasification plant

Hi there,

I'm writing about the proposal for a gasification plant to be built in Esquimalt. I had the opportunity to cover the topic for a university assignment, which gave me an excuse to go through all of the technical materials in detail, as well as review literature from other successful gasification projects.

I found that Pivotal IRM's analysis was thorough, covered everything that I could think of to question (as well as much more that I didn't think of), and clearly explained the project in language that the layperson can understand. I'm wholeheartedly in favor, as a young homeowner and environmentalist, hoping to stay in Esquimalt for the long haul.

Thanks,
Shannon Graham
